

PROJECT OF DISTINCTION™

BUS RAPID TRANSIT SHELTERS – RIVERSIDE, CA

BUS RAPID TRANSIT SHELTERS – Sleek lines. Stylishly modern. Durable strength.

THE PERFECT FIT TO REFLECT THE CHARACTER OF YOUR COMMUNITY

Tolar Manufacturing Company fabricated Bus Rapid Transit shelters to support Riverside Transit Agency's new RapidLink express buses between Riverside and Corona.

LOCATION

The City of Riverside is located in southern California and is in Corona-based Tolar Manufacturing Company's backyard. Named for its location beside the Santa Ana River, Riverside is the most populous city in the Inland Empire.

Founded in the early 1870s, Riverside paved the way for California's citrus industry. Surrounded by mountains and home to over 300,000 people, the city's thriving educational institutions, multitude of parks and outdoor spaces, and varied business industries provides something for everyone.

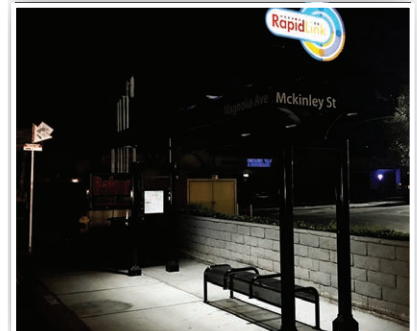

Whether heading to Riverside's vibrant downtown or home to one of its 28 neighborhoods, Riverside Transit Agency, covers the community's nearly 82 square miles.

PROJECT

Tolar Manufacturing Company fabricated Bus Rapid Transit shelters to support Riverside Transit Agency's new RapidLink express buses between Riverside and Corona.

Tolar Signature Custom 17' BRT transit shelter located in Riverside, California featuring aluminum roof panels, raised decorative battens, support posts with decorative scroll and integrated map case, escutcheon covers, dusk-to-dawn UL listed LED illumination, agency branding with solar-powered backlit signage, station location identifier and perforated metal bench.

Tolar's Bus Rapid Transit/Rail shelters are both beautiful and well built, bringing a combination of purpose-driven design and unsurpassed durability to your community that will last for decades. Cutting-edge looks and quality craftsmanship . . . that's the Tolar Difference.

A WORD FROM OUR FOUNDER

"Our company's core values of openly listening to the needs of our clients while leaning into our strengths in flexibility and versatility of design and structure ensures that we successfully execute on our client's vision while delivering durable shelters of distinction."

- Gary Tolar

MORE PROJECTS FROM TOLAR MANUFACTURING

Creating bus shelters and other outdoor structures of durability and distinction that reflect the character of your community ... *that's the Tolar Difference.*

CUSTOM SIGNATURE SHELTERS FOR THE BUSY LA SIERRA METROLINK STATION

The 30-ft by 7-ft custom Signature shelters throughout the station support transit riders making connections between Metrolink and local RTA transit routes servicing 2500 square miles.

Decorative battens and radius posts support wide aluminum roof panels providing shade over the spacious seating with matching trash receptacle. Schedules and routes are prominently displayed in integrated map cases and each shelter provides security lighting utilizing four solar-powered, UL-listed, dusk-to-dawn LED lighting units manufactured by Urban Solar.

A coordinated effort was made to ensure these station shelters align with Tolar-fabricated BRT shelters located throughout Riverside.

LOS ANGELES SOUTHWEST COLLEGE TRANSIT STATION

Tolar Manufacturing adapted 16-foot shelters from its Signature Custom line to form a transit station for Los Angeles Southwest College. Working closely with the school's project architect the Tolar team created a solution that serves the transportation needs of the school's growing enrollment, while meeting site restrictions and reflecting the school's powerfully branded identity. Illuminating the bus stops with environmentally-responsible solar powered lighting was another critical element of the project.

Other environmentally-friendly features include a custom powder coat finish that emits minimal VOC's into the local environment, seating that features HDPE slats around an architectural aluminum frame.

BUS RAPID TRANSIT SHELTERS FOR JTA

Tolar Manufacturing, through its long-term contract with the Jacksonville Transportation Authority, worked with their team and various stakeholders to develop a menu for JTA's nationally recognized First Coast Flyer service.

Our portfolio of amenities for this project included a 15' transit shelter with advertising and non-advertising options, custom branding, Mesa benches, bike loops and a 10' branded passenger-informing totem with twin 32" digital displays in a NEMA-rated enclosure to provide up-to-date passenger information.
